## Create electronic forms quickly and easily with Easy Forms.

---

### What is EasyForms?

EasyForms is a web part that creates electronic forms based on a SharePoint list. Simply create a list with the information you wish to store and EasyForms will take care of the rest!

The form can be updated in just seconds to capture new information by adding columns to the SharePoint list.

With EasyForms even novice web users are able to create dynamic electronic forms!

You can create, hide and move fields up or down in the list with a custom easy-forms interface that integrates seamlessly with the Tool-Pane.

### Benefits of EasyForms

- Easily create electronic forms based on a SharePoint list.
- Store information in any SharePoint list, works across sites/domains.
- Easy-to-use interface for modifying, adding or removing fields in your form in just seconds.
- Receive email alerts when a form is submitted.

## A closer look at EasyForms ... In Action!

Form Created From SharePoint List      EasyForms Task-Pane Editor

The screenshot shows a Microsoft Internet Explorer browser window displaying a contact form on the Infotech Canada website. The form is titled 'Get in touch with Infotech' and includes a section for 'Information Request'. The form fields include Title, First Name, Last Name, Email, Request Type (set to SharePoint), Telephone, FAX, Contact Preference (set to Telephone), and Comments. A 'Submit' button is located at the bottom of the form. To the right of the browser window, the EasyForms Task-Pane Editor is visible, showing a list of fields for the form, including First Name, Last Name, Email, Contact Preference, Request Type, Telephone, and FAX. A red arrow points from the 'EasyForms Task-Pane Editor' title to the editor window. The browser window also shows the Infotech Canada logo and navigation menu.
